## **CLENERGEN CORPORATION**

**CLENERGEN – one of India’s largest biomass power generating companies and a global specialist in the cultivation and the production of sustainable biomass feedstock - is available for meetings in New York from June 20<sup>th</sup> until June 30<sup>th</sup> through its Chairman and CEO Mark Quinn.**

(New York, USA – June 20th 2011) Clenergen Corporation (**OTCQB: CRGE - BOERSE FRANKFURT: 9CE**)

Clenergen offers strategic clean energy generation and supply of biomass feedstock to address the requirement for renewable and sustainable supplies of electricity. They have assembled an experienced managerial, engineering and technical team capable of increasing the efficiency levels of existing combustion steam biomass power plants along with the implementation of second generation gasification and anaerobic digestion technologies. This ten day visit is a unique opportunity to meet the founder of Clenergen - Mark Quinn – live in New York, or via exclusive conference calls.

### **CLENERGEN: THE COMPANY**

The Company has identified two species of tree and bamboo suited for dedicated energy crop plantations for highly efficient biomass production. Additionally, Clenergen has applied a Tree Adaption Process (TAP), which is designed to rapidly increase the rate of growth by up to 40% per annum, resulting in an economically viable source of biomass for generating a renewable source of electricity. Through the direct supply of biomass feedstock, the cost of production is reduced by as much as 30%, resulting in increased operational efficiencies and a cost competitive supply advantage over other sources of renewable energy.

Clenergen has an enviable position as the leading converter of biomass to energy in India and has plans to expand in this space, building on the existing government and business relationships they currently have developed. Clenergen has furthermore operations in the Philippines and Guyana with strong relationships on the African continent.

**Clenergien has spent many years building their current business reality and should be poised to move to the next level of sales and profitability. The company has recently restructured its Board of Directors in preparation for its expected institutional fundraising efforts in North America.**

## **CLENERGEN AND SUSTAINABILITY**

Clenergien embraces more than any other company the principles of Sustainability with a focus on making local access to energy available to both developed and developing nations, all while converting wasteland into greenery and therefore fight soil erosion, increase the generation of oxygen and the absorption of CO2 emissions.

### **More on Clenergien**

**Clenergien Corporation is a publicly traded company with its common stock quoted in the USA on the OTCQB Market (Symbol: CRGE) and in Germany on the First Quotation Board, Open Market of the Frankfurt Stock Exchange (Symbol : 9CE).** Clenergien offers strategic clean energy generation and supply of biomass feedstock to address the requirement for renewable and sustainable supplies of electricity.

Clenergien has developed a unique modular system for gasification and localized plantation management. Clenergien also plans to provide biomass feedstock for producing wood pellets for co firing with coal to produce low emission electricity.

Clenergien Corporation uses biomass feedstock to implement sustainable supplies of clean energy for captive end users, islands, mining companies, government or privately-owned power grid systems and other end users. The "Distributed Environmental Power System" marries significant proprietary advancements in plant science with proven long standing engineering technologies to achieve this goal.
