CLENERGEN CORPORATION (OTC BB: CRGE) ANNOUNCES ACQUISITION

Clenergen Corporation today announced it will acquire 100% controlling interest of Clenergen Corporation Limited based in the United Kingdom and establish Clenergen Corporation as one of the leading Biomass Power Generation Companies globally. www.clenergen.com

Clenergen Corporation Limited retains 100% controlling interest in Clenergen India Private Limited, a subsidiary company based in Chennai, set up to implement a 80MW per hour Biomass Power Plant in the States of Tamilnadu and Karnataka India. Clenergen India signed a Power Purchase Agreement with the Power Trading Corporation of India Limited (PTC) that is valued at \$1.2 billion over a 15 year contract period. Clenergen India intends to float on the SENSEX stock market in December 2009 and have engaged Ernst and Young to raise the debt and equity requirements. The company has secured land leases in Tamilnadu and with the Government of Karnataka to cultivate 20,000 acres of land for the production of biomass for its gasification power plants.

Clenergen Corporation Limited acquired the assets of Enhanced Biofuels and Technologies Limited in April 2009 for \$3,000,000. EBT provided 4 years of research and development of biofuels and bioenergy feedstock's, conducted at its research laboratories in Coimbatore, India. As a result the Company has identified a species of tree and applied a Tree Adaptation Process (TAP) which increases the growth rate by up to 40% per annum.

Commenting on the acquisition Dr Arvind Pandalai, Chairman of Clenergen Corporation said " The merger of our global operations under Clenergen Corporation positions the company to implement its agronomy program for the cultivation of biomass on a global scale and promote the use of carbon neutral gasification power plants throughout its region of operations".

About Clenergen Corporation

Clenergen Corporation is a publicly listed company on the OTC stock market (symbol CRGE). Clenergen offers strategic Clean Energy Generation projects to address the requirement for renewable and sustainable supplies of electricity. Clenergen has developed a unique modular system of co-gasification and localized plantation management using proprietary and mixed biomass feedstock to implement sustainable supplies of clean energy to regional, independent clients and national grids. The "Distributed Environmental Power System" marries significant proprietary advancements in plant science with proven long standing engineering technologies to achieve this goal. www.clenergen.com
